Description	The CPAP Inventory Management System enables you to easily manage and track your CPAP-related inventory, including supplies. It was developed especially for organizations that dispense CPAP equipment and supplies.	The CPAP Follow-up System is an affordable and easy-to-use supplies replenishment software program. Track patient dispensing and create (supplies and compliance) follow-up reminders.	ZMR Blue is a browser-based EMR for sleep labs, hospitals, and service companies providing ambulatory or lab-based sleep diagnostic and therapy services. Customizable and configurable for any lab.	ZMR Green is a sleep lab management system including the ZMR Blue features with data transfer, online access for scoring/interpretation, hosting, storage, and archiving of patient data and sleep studies.
Benefits	Maintain an accurate inventory. Eliminate "stock-outs." Improve cash flow through efficient ordering. Track patient dispensing. Maximize patient supplies replenishment. Extremely helpful during product recalls. Many useful reports.	Fresh supplies go a long way toward increasing patient compliance while providing a steady (and often overlooked) revenue stream. Database technology allows you to create many useful reports.	Compatible with any PSG system, ZMR Blue provides a hosted medical record system including patient record creation, scheduling, lab workflow, report management, automatic notifications, referral analysis, and clinical reporting tools.	A paperless, secure, online EMR solution and sleep data management system that reduces IT costs, improves workflow, reduces turnaround time, and improves marketing efforts by providing clinical and operational reporting.
