

Company		SleepEx LabRetriever Inc	Somnaware Healthcare Systems Inc	ZH Healthcare Inc
Software		 <p>LabRetriever</p>	 <p>Somnaware</p>	 <p>blueEHR</p>
Released In		2007	2012	2008
Pricing Overview		www.mylabretriever.com/product-pricing	Contact sales@somnaware.com	Contact 855-936-3367
HIGHLIGHTED FEATURES	In-Lab Sleep Study	Upload studies to the cloud; upload and view video; score online or download studies locally; auto-score using integration with EnsoData; create over-read, pool physician assignments, and other workflows; use PSG manufacturer or customer interpretation report templates; notify staff and referring physicians automatically.	Compatible with all PSG equipment manufacturers and recording applications via APIs; end-to-end data management with 7+ years cloud storage for all studies; studies can be scored securely from anywhere.	Highlights not provided.
	At-Home Sleep Study	Manage HST inventory; scan devices using a barcode technology; ship and track HST devices with FedEx and UPS; process HST studies.	One-click HST device initialization via the web; compatible with all HST devices; shipping module with major carrier integration for in-app label generation and tracking; HST device inventory management.	Highlights not provided.
	For Lab Managers	Manage single, multi-site, and regional calendars for scheduling; analyze statistics with reporting and lists; create user-specific dashboards to track operations; assign built-in tasks to an individual or groups of staff; choose display "alerts" to highlight critical diagnostic or workflow data; control what users see with robust access control and permissions system; track clinic notes.	Patient tracking through every stage of the sleep care cycle; HL7 compatibility with all EMR vendors to automatically exchange demographics, scheduling, results; eliminate scanning documents and toggling between applications; multi-facility scheduler for ASTs, HSATs, consults, and CPAP setups with electronic questionnaires and patient questionnaires.	Highlights not provided.
	For Physicians	Access sleep studies and HSTs from anywhere, at any time; sign reports with e-signature.	Cloud-based interpretation environment for all study types and devices; physician-specific clinical preferences and report templates; one-click report generation with e-signature and DME prescription generation; comprehensive database of discrete and clinical data that can be used for research.	Highlights not provided.
	For Patients	Notify for appointment reminders/confirmations/reschedules using text messaging; consult with a physician using telehealth; visit the patient portal to fill out forms, get information, and see test results.	Appointment reminders via SMS; web-based patient portal for questionnaires and consent forms.	Highlights not provided.
	Payor-Related	Store all payor information for primary, secondary, and tertiary insurance; interface with third-party billing systems; create a superbill.	Store all payor information; create an automated billing workflow; integrate with billing software like Athena, Brightree, Epic etc.	Highlights not provided.
	Therapy-Related	Prompt physicians automatically for DME orders; send orders to DME providers using e-fax; allow access to DME providers to view DME orders; store PAP compliance reports with the patient record.	Care management console that extracts and unifies PAP usage data across patient population; automated patient engagement to maximize therapy adherence; real-time dashboards that visualize overall adherence rate, patients at-risk, comorbidities; detailed reporting by patient cohort(s), payors, AHL, etc.	Highlights not provided.
	Security & Data-Sharing	Integrate with EMRs & 3rd party systems; partner with LabRetriever using its API.	SOC2 Certified; Fedramp; HL7 compatibility with all third-party applications.	Highlights not provided.
